# Lancaster Farming

Vol III. No. 49. Quarryville (Lancaster County) Pa., Friday, Oct. 17, 1958 $2 Per Year

THERE'S SOMETHING about a crisp, sunshiny fall day in Lancaster County Sitting on a hillside, watching a tractor and disk write their message in the rich soil. Strolling through frost nipped clover and squinting at the horizon, faint and faraway through the golden haze. And all the time thinking — this has been the best production year in the history of American agriculture, a year to remember with a stroll across the hillside on an autumn afternoon. LF PHOTO

## Annual 4-H Dairy Banquet Slated For Oct. 24

More than 200 Lancaster County 4-H Dairy Club members, parents, officials and guests are expected to attend the annual Dairy Banquet at 6 45 p. m., Oct. 24 in the Strasburg fire hall.

Banquet festivities will be highlighted by presentations of 12 trophies, a pair of $25 cash awards, four plaques and lesser awards to honor outstanding efforts 4-H dairy work

Paul Anderson, Penn State dairy specialist, will be principal speaker for the event

Hosts for this year's banquet are members of the 4-H Ayreshire Club,, with Paul Herr, Jr., Holtwood RD1, club president, serving as master of ceremonies.

A full evening's entertainment is planned, along with the awards ceremony and the speaker, Herr reports

North Lancaster Kiwanis Club, a principal backer of 4-H dairy activities, is donating the trophies and cash awards, Herr added.

## Auditor Added To USDA Staff At Lancaster Yards

E H "Buck" Haller, formerly station auditor for the USDA Market Service, Livestock division, Packer and Stockyards branch, at E St Louis, Ill, has been named as station and division auditor for the Lancaster Stockyards

He is the first permanent auditor assigned to the 11-state northeast district His duties include auditing the records of all firms and dealers engaged in the livestock business in interstate commerce in this district

Haller, a native of Evansville, Ind. his wife and two children will make their home in Lancaster

## Corn Yields Push Record to 62 Bu.

HARRISBURG — Predicted record corn yields and production in the Commonwealth were borne out this week in a report by the State Department of Agriculture.

The Pennsylvania Crop Reporting Service said that generally good growing weather during September pushed the expected corn yields to 62 bushels an acre, six bushels above the previous record set in 1956 and boosted production to 76,616,000 bushels, an all time high for the State. Very little soft corn is expected, except in some Northern Tier counties.

Most other fall harvested crops are expected to break or equal records.

Soybean yield might reach a record high of 22 bushels an acre, the report added. Production is 59 per cent above last year, but is still below normal

Hay output is 26 per cent greater this year than last and is 18 per cent above average. Winter supplies are generally ample throughout the Commonwealth.

Tobacco harvest finished early in September with a record yield of 1,750 pounds an acre and production hit 50 8 million pounds. No frost damage was reported.

Potatoes grew well this summer, but wet weather in the northern part of the State hampered harvesting Production for both late summer and fall varities is above two years ago, but is below average.

Grape production is estimated to be 28 per cent above last year with an expected yield of 5,500 tons to be harvested in the Erie fruit belt.

With harvest of several fall varieties in progress, apple production is seven per cent above last year and 17 per cent above average.

## County 4-H'ers Plan Illinois Trip

Victor Plastow, Lancaster county 4-H director, has announced that plans for a Thanksgiving trip of five carloads of county 4-H ers to Plano, Illinois are rapidly taking shape.

The trip will be in the way of a return visit with Illinois 4-H'ers from the Plano region who spent a week in Garden Spot 4-H'ers homes during the summer.

The local club members will visit in their summer guests' homes, and travel to Chicago for the International Livestock Exposition which will be in progress at the time.

Approximately 20 county youths are expected to participate in the week-long trip, Plastow reports.

## State Crop Round-up

HARRISBURG — Pennsylvania farmers experienced their driest week as the current crop season drew to a close, the State Department of Agriculture said today.

Frosts during the week ended Monday killed nearly all of the standing summer crops in the Keystone State, the State Crop Reporting Service said in the final Crop and Weather Round Up for the season.

Temperatures averaged two to four degrees above normal for the week while there was almost no precipitation in much of the State. The only notable rainfall was in the northwestern mountains where about a quarter of an inch fell. A few snowflakes, first of the season in Pennsylvania, were spotted in the Central Mountains Monday morning

Farmers in many areas of the State finished making corn ensilage during the week. Some corn in northern tier counties intended for ear corn did not mature and is being made into ensilage. Grain corn harvest got underway in several sections and made good progress.

Winter wheat seeding is al most completed, buckwheat harvest continues and potato digging is making good progress

The weekly round up of crop and weather information will be resumed by the Crop Reporting Service in early April 1959.

## Farm Show Deadlines Set For Nov.-Dec.

HARRISBURG — Entries for sheep, swine, beef and dairy cattle and most poultry to be displayed at the 1959 Farm Show must be received by Nov. 17, the State Farm Show Commission announced today.

Entries for draft horses and the folk dance festival also close on Nov. 17. The 43nd Pennsylvania Farm Show will be held Jan. 12 through 16 at the 14-acre State Farm Show Building in Harrisburg.

Lambs and beef cattle entered by 4-H Club members have an extended entry deadline, but 4-H Club and vocational agriculture entries in the dairy and swine shows must be filed by Nov 17.

Round-ups for 4-H Baby Beef and Lamb Clubs usually are not held until late Fall, thus requiring a later deadline, Dec. 13.

Future Farmers of America and 4-H Dairy Club members showing at the 1958 State Junior Dairy Show Sept. 18 at the Farm Show Building will provide stiff competition at the Farm Show. All prize winning animals at the Junior Dairy Show were automatically entered in the 1959 Farm Show

Total premium offerings come to an all-time record of $62,287.50 to be paid to winning exhibitors in the 1959 Farm Show's 27 departments.

Whie no new departments have been added for the 1959 Farm

(Continued on page 12)

## Barley Supports Broadened For Lower Grades

The U.S Department of Agriculture today broadened the price support eligibility for 198-crop barley to include grade No. 5 barley or No. 5 garlicky barley.

This action will provide greater price protection to producers for this year's barley crop which has a highly than norma lproportion of thin barley due to unfavorable weather conditions, particularly in North Dakota.

To determine the loan rate for specific lots, barley grading No. 5 will be discounted 18 cents per bushel below the basic support price fo rgrade No. 2 or better, in addition to other applicable discounts.

Prior to this change, price support had been limited to barley grading No. 4 or No. garlicky.

The minimum test weight permitted under grade standards for No 5 barley is 36 pounds per bushel The maximum amount of thin barley permitted is 35 per cent for grade No 4 and 75 per cent for grade No 5.

# Price Average Drops to 16.4 At Lancaster Poultry Exch. Auction

LANCASTER Oct 9 — The Oct 9 broiler market at Lancaster Poultry Exchange continued the season's trend by dropping some more to a 16 40 average on 38 lots of 161,650 broilers sold

A total of 62 lots were offered with 189,450 birds, with 53 lots including 174,920 birds being sold The listing included 13 lots of capettes which sold bringing from 18 1 to 21 3 on 11,270 birds

At last year's corresponding sale, 37 lots were offered with 79,740 birds Thirty-one lots sold, with 74 890 birds The average for 24 lots of broilers was 18 63

## Weed-Free Tobacco Beds

Here's how to do it. Sprinkle VAPAM® on your seed beds now In the next 30 days it kills all those weeds and grasses, germinating weed seeds, soil fungi and those invisible nematodes. Come seeding time you have the healthiest soil in the state' You get more seedlings per square yard — up to twice as many. And only a few — if any! — weeds Your seedlings are really strong and vigorous You can transplant fast for the best crop you've ever seen.

Result is hundreds of dollars saved in back-breaking work and weeding costs. Yet VAPAM costs only a penny per square foot Make more profit next year! Don't share your crop with weeds and soil borne diseases. Put VAPAM on your seed beds now. No special equipment needed It's so easy and safe to sprinkle on You get stronger seedlings, weed control and more profit. Do it now for best results Approved by the Department of Agriculture for all food and fibre crops

# Delmarva Broilers Off to 15.90; Georgia, Alabama, Carolina — 15

Delmarva's broiler-feed ratio for the week ending Oct 10, dropped one point from the previous week's 3 5 to 3 4, due to a half cent fall off in broiler prices, although feed prices dropped 80 cents per ton on 20 per cent broiler mash.

The Delmarva broiler average slacked off to 15.90 as compared with 16.42 the previous week, 19 30 six months ago and 17 01 one year ago.

The ratio is two points below last year's 3 6 mark.

The Delmarva market for the week was steady, with offerings moderate, demand fair Prices paid at the farm Broiler and fryers 2½ lb. and over, mostly 3-3½ lbs, 15-16, 50,813 head Eight per cent 15-15½, 60% 15½-16, 10% 16-16½ inclusive. Eleven per cent undetermined 11% intra company transfers.

Caponettes 17.70-24 Eastern Shore Poultry Growers Exchange Oct. 10 volume 544,600 head. Volume sold 536,000 head. Prices ranged 15 10-16 20. Mostly 15.50-15.80. Al sizes 3-4 lbs. well distributed in most ranges Also sold two lots caponettes 1,900 head pullets, 4½ lb. 17.70, and 850 cockerels, 6 lb at 21 60.

Other major broiler production areas report the week's market as follows

GEORGIA· Demand mostly fair though ranging from good in some insances to slow in others. Supplies generally ample for present needs Buyers offerings prices and volume Monday: Broilers and fryers 2¾ lb to 3¼ at farm 15¢, 796,000 head. FOB plants 16¢, 386,000 head. Fri. and Sat ; Range 15-15½, 977,000 head, 88% at 15, 9% at 15½, 3% book at 15, FOB plants 16, 619,000 head, 80% at 16¢, 20% intra company sales booked at 16.

NORTH CAROLINA. Offerings fully adequate at some points barely adequate at others. Demand varies from slow to good generally fair. Prices Monday: Broilers and fryers 2¾-3½ bs. at farm 15, 569,500 head. 88% at 15. 12% undetermined. Heavy hens, 15-17, mostly 16-17.

SHENANDOAH VALLEY· Broilers and fryers, demand fair to good. Supply adequate. Prices paid at farm 2½-3½ lbs. at 15-15.8, 284,100 head, 51% at 15, 7% at 15¼, 1% at 15½, 12% at 15 8, 29% undetermined. Weekly summary — Broilers and fryers week ended Oct. 10, 1,128,000 head. 2½-3½ lb, 15-16, weighted average, 15 30. Change in reported purchases compared with previous week is plus 7.2%, corresponding week in 1957 — plus 16 3%.

ALABAMA. Broilers and fryers Demand generally slow, offerings and supplies fully ample, to excessive and sizes heavy at most points. Prices: 2½-4 lb at farm 14-15, 444,078 head, 3% at 14, 97% at 15 FOB plants, 100% at 16, 122,900 head.

# Is Parity Obsolete ?

A significant and little known farm bill was voted on in the U S Senate recently

It was a bill that called for the elimination of the parity concept from all farm legislation at a set future date.

When farm leaders in the early thirties, representing both parties and a number of commodity groups, met to draw up farm legislation, they concluded that some standard with which to measure farm income in relation to non-farm income was essential As a result the parity concept was born — the legitimate child of intelligent economic planning

In all farm legislation from the early 30's to the present where farm prices were in any way involved, the parity concept was recognized Federal reports of farm prices or incomes are usually stated in terms of the parity concept. It has come to be almost universally recognized, and accepted as the standard by which farm prices were to be expressed

We do not contend that the parity principle is a perfect measure of farm prices It is not, and it has been revised, and will no doubt need further revisions from time to time

But it is one thing to correct the errors on a measuring rod and another thing to throw the rod away We don't throw away the yardstick because the bean stalk does not stand as high on it as the sweet corn stalk

This Bill before the Senate was a case of attempting to throw the whole parity principle overboard

Who desires this?

It has been surmised for some time that the parity concept was embarrassing to some in highest policy making positions Specifically, we have in mind those who regard lower farm prices as the panacea for farm ills—especially farm surpluses.

It is clear that they have been moving gradually toward a position where parity was to be regarded as of diminishing importance The role of the future farmer as they envisioned him was that of a producer of cheap food. Prices to him were not to be measured in terms of prices of goods and services he must buy This would be increasingly embarrassing.

At first they just wanted to revise the original parity formula — that is adopt a later date than 1910-14 as the standard. This was done, but it was not enough. The farther they went down the road of lower prices, fewer farmers and cheap food the more obnoxious the whole parity idea became Even when we accept parity of income — instead of parity of price — as the goal, we are still dealing with parity The whole parity idea must be thrown overboard .

It was this that the Dirksen (Rep Ill ) Bill was designed to do We may be quite sure that the Senator was not merely indulging a personal whim when he introduced his bill While to our knowledge no organized group openly espoused the bill, its passage would have been heartily applauded by some in highest policy making positions in Agriculture, the grain trade and industry generally.

The Bill was decisively defeated We may confidently expect that this is not the end of the effort to abolish the parity idea The effort has friends in prominent places.

—The Farmers Exchange

## Uncelebrated Day

**Lesson for October 19, 1958**

THE DAYS we celebrate are milestones, turning-points They are days marking a line between Before and After. A birthday, a wedding day, a Declaration of Independence, these are days worth celebrating So the church does right in celebrating, as we do, various important events connected with the life of Jesus. Not all churches observe all these days, but over wide areas of Christendom they are celebrated by many congregations the annunciation to Mary the Virgin, the birth of Jesus, the presentation in the temple when he was 40 days old, his crucifixion, his resurrection, his ascension. But his baptismal day is uncelebrated, that day when he, then about 30 years of age, was baptized by his cousin John

Dr. Foreman

### A Decisive Day

It seems all the stranger that the church should not celebrate this day, because it was such a turning-point in the life of Jesus On the one hand, this was the day before which Jesus was a private citizen, a carpenter, a home-town man, but never again This was the day after which Jesus was the dedicated Teacher, the mysterious Messiah, as never before This was the line between Jesus' private and his public life On the other hand, on the day of his baptism and from that day forward, Jesus was endowed with the Holy Spirit as never before Whether you take the story of the dove literally or as a symbol, it is clear that John, who had a keen spiritual eye, realized that this was the day the Spirit came, an event as definite as the settling of a dove on a man's shoulder Immediately after this great day we read in one gospel the Spirit "led" Jesus For another gospel writer the word is not "lead" but drive. Why should the church not celebrate that high day?

### Embarassing Baptism

The reason for the church's peculiar silence about this great day is perhaps that we are embarrassed by one thing that took place then: Jesus was baptized! This baptism of John's was distinctly understood to be a baptism "of repentance, for the remission [forgiveness] of sins." But what sins did Jesus commit? How could he need forgiveness? The church finds it easy to understand the Spirit's coming, the Voice from Heaven may be harder to understand, but it "fits" what we believe. But the baptism does not appear to fit It looks as if either Jesus was a sinner after all, and confessed his sins in being baptized, or else he was making people believe he had sinned—which of course would be a sin in itself.

This is indeed a puzzle, but we may be able to find an answer. Let us be bold enough to rule out three possibilities at once.

Jesus was not baptized in order to have his own sins forgiven The church is surely right in affirming that Jesus lived without blemish, the one perfect man in history.

Jesus was not baptized to fulfill the Old Testament law, for no law in the various codes of the Old Testament requires all men to be baptized "Fulfilling all righteousness" is not the same thing as obeying a specific law.

Further, Jesus was not baptized as if he were playing a part, encouraging others to do as he did A perfectly healthy mother will sometimes encourage a timid child to take medicine by first taking some herself. Is Jesus our considerate Elder Brother who takes a "cure" he does not need, in order to coax us to take it because we do need it?

### Calvary Began There

No no to all these theories of the why of Jesus' baptism The real reason lies deeper. This was the day (so far as we know) Calvary began Jesus became known in his lifetime as the "friend of sinners" and afterwards and ever since, he has been called the savior of sinners The Bible shows us that he did this by becoming one of us, identifying himself with us, even the worst of us, so that as St Paul says, "he who knew no sin was made sin—for us." Jesus publicly, dramatically, decisively, by his baptism declared and declares that he sides with the repentant sinner, always, rather with those who in their own eyes need no repentance.

## THE BENSON BOOM

A man Republican party chieftains wanted fired only three months ago Ezra Taft Benson this week is being quietly groomed for entry into the 1960 presidential race

As recently as last July many of the top Republicans in Washington labeled Benson a failure as Secretary of Agriculture and too big a liability to carry into the 1958 election campaign

Why this sudden reversal? What has happened to change the quiet-spoken church official from Utah into a political hero almost overnight? His is beyond doubt one of the quickest political comebacks on record

There are several reasons given but the most plausible are that (1) the farm revolt against him has quieted down (2) he is popular with many city voters and (3) he is a good speaker and campaigner

Benson has been one of the most controversial men in President Eisenhower's Cabinet He has taken without flinching criticism that would have discouraged many men He has unswerving confidence in his principles

### Farm Program

The Administration farm program which features more freedom for farmers from government pricing and production controls has been more popular with consumers than with farmers or with the matter with Congress

Despite lower supports for many crops the index of farm prices now is 5 above a year ago although still 15 below 1952 Benson recently released figures to show that farm income so far this year has been 1% higher than in the same months of last year

Late in the past session of Congress Benson teamed up with congressmen from urban areas to defeat a farm bill backed by the Democratic majority, and then push through a bill which it was claimed will result in lower farm and food prices

### A Taft Man

Benson was a close friend and political supporter of the late Sen Robert A Taft a distant relative his middle name, Taft, is a family name It is reported that Sen Taft recommended him to President Eisenhower

The quiet campaign to promote Benson for President is being backed by many of the former Taft supporters They comprise what is generally described as the conservative wing of the Republican party

Although Benson has been a staunch supporter of President Eisenhower he has not become too closely identified with Eisenhower-Republican branch of the party He however campaigned for the re-election of Mr Eisenhower in 1956

Benson is a tireless and convincing campaigner Since the close of Congress he has been making three and four speeches a week in support of his farm program and Republican congressional candidates some of whom have in the past been critical of him

He is a deeply religious man having taken leave as a member of the Council of Twelve Apostles of the Church of Jesus Christ of Latter Day Saints to become Secretary of Agriculture in 1953

# Now Is The Time . . .

**By MAX SMITH**
**County Agricultural Agent**

Max Smith

TO FERTILIZE LAWNS — Late September or October is one of the best times to top-dress lawns for better turf Applications of 25 to 30 lbs per 1,000 sq ft of 0-20-20 or 0 15 30 are recommended Apply during periods when the grass is dry or wash into lawn thoroughly

TO BE CAREFUL WITH NEW CORN — New corn is high in moisture and may bloat or scour livestock if fed too much at the start Grind frequently to avoid heating and use only 20 to 30 per cent of total amount for the first week or ten days Hog producers need not be concerned about danger of feeding new corn Sheepmen should be especially careful

TO UTILIZE SHREDDED CORN FODDER — Many livestock men regard shredded corn fodder as one of the best bedding materials It will absorb maximum amounts of moisture and may still be returned to the field for fertilizer Some growers use rota-beaters or shredders in the field and then rake and bale for easier handling Care should be used to have it dry to prevent molding and heating

# E-Town Couple Attends Mexico City Poultry Fete, As Contest Winners

About 12 months ago, when Samuel Ginder, E-town, RD 3, returned home from town one day, he jokingly informed his wife, "Well, I just signed us up for a trip to Mexico City — that is, if our name is drawn."

It was, and they went

Having recently returned from their trip, sponsored by the Quaker Oats Company, the Ginders report they had a very enjoyable vacation on the 10 day jaunt "south-of-the-border"

Focal point of the trip was the World Poultry Congress in Mexico City, but the Ginders report they had plenty of time for touring and sightseeing along with visiting the Congress

"Actually, the congress wasn't any bigger as an exposition than the Farm Show at Harrisburg," Mrs. Ginder reports. "The thing was they had scientists from all over the world giving reports during the meetings They were all in foreign languages and you couldn't understand what they were talking about, even if they had been in English But that didn't bother us any"

The Ginders left the Harrisburg airport at 8 a m, Sept. 20. Stopovers in Wash, D.C and Dallas added several more couples to the group and they arrived in Mexico City at 6 p m.

Monday they registered for the congress, toured the exhibits and the city. Much of the rest of the week was spent in typical tourist fashion, banging around the city's teaming traffic-ways in jitneys, visiting many famed cathedrals, the university and other points

One day was spent on a tour to a local poultry farm, ultra-modern in every respect, they report While there, Congress delegates enjoyed a barbecue dinner

"Saturday, we went to Acapulco It is a beautiful winter resort, with a population of about 30,000, but an accumulation of 100,000 more We returned to Mexico City on Monday and flew back to arrive home on Oct. 1," they stated.

They reported the U S was not too well represented in the poultry supply and equipment exhibits, although many of the major firms in these fields had representatives on hand.

We had a wonderful time and now we're planning a future trip to the West Coast, with visits with the couples we toured with along the way One thing we found, there are nice people from everywhere. Everybody was just great, and that includes the Texans in our group"

# New Holland Club Ends 1958 Work

The New Holland 4-H Community club held the season's final meeting, Oct 6, at the home of Roy Mentzer, New Holland RD 2, with 18 members attending

J David Lapp presided during the meeting Final plans for a hay ride Oct 18, wre announced, concluding the club's activities for this year.

Members with flowers and pig projects exhibited at the New Holland Farmers Fair, with the flower exhibit taking a $25 blue ribbon prize

Club members are Mary Ann Wolgemuth, Allen McQuate, Thelma Benner, Betty Diller, J. David and Anna Pearl Lapp, all of Bareville RD1. Also Donna and Dawn Peters, Roy M Mentzer and Dale Herr of New Holland RD2 David Denlinger and Wilmer Wenger, Lancaster; Robert and William Fisher, East Earl RD1, Marilyn Gentzler, New Holland Pike, and Aaron Hoober, Jr, Nancy and Barbara Horning, New Holland, RD1

Other members are Billy Messner, Terre Hill, Judith Ann Buch, Ephrata RD2, and Marie Horning, New Holland

Club leaders are Mr and Mrs James Martin, New Holland RD1, James Messner, Terre Hill, and John B Lapp, Bareville RD1.

# Sec. Benson Appoints Committee To Study Conservation Facilities

Secretary of Agriculture Ezra Taft Benson announced the appointment of a working group to study facility needs for soil and water conservation research. The study is being made at the request of the Senate Committee on Agricultural Appropriations.

Members of the working group are: G. M. Browning of Iowa State College, representing the State Agricultural Experiment Stations, Gerald E. Ryerson of the Soil Conservation Service, and Dr. Cecil H. Wadleigh and Dr. Darnell M Whitt of the Agricultural Research Service.

Secretary Benson directed the working group to focus its attention on problems of national and regional importance, leaving for the attention of the states problems having only state or local significance.

The working group will receive recommendations from Federal State, and local organizations concerned with the conservation of soil and water resources Interested parties are invited to present their evaluation of the kind and extent of soil and water problems needing research A series of public hearing is planned

Those interested in making presentations to the working group at these hearings should make their requests in writing prior to Aug 29 to the secretary of the group, Dr. Darnell M Whitt, Plant Industry Station, Beltsville, Md Scheduled dates and locations of the hearings will be announced later.

The Senate and House Committees on Agricultural Appropriations received a number of proposals for soil and water conservation research facilities during the hearings on appropriations for fiscal year 1959 The Committees stated that the recommendations received had merit, but that the total needs of the country for soil and water conservation research facilities should have careful study.

Farm phone service costs are up. Farmers are paying an average of $3 85 a month as compared to $3 66 last year

NOW THAT'S more like it! Visitors to the Mt. Joy Farm Show last week could have enjoyed the scene our photographer watched in the Baby Beef exhibit, had they been on hand at the right time. One sleek Hereford "had an itch." Unfortunately, his halter rope was too short for him to reach it comfortably. But after many attempts and shifted positions, he made it. He scratched happily, while his neighbor grunted in sympathy. Can you imagine peach fuzz down your neck and you in a straight jacket?

## Herdsman Awards Announced for Show

TIMONIUM, Md. — Prizes at a livestock show traditionally are awarded to the owners of the animals who win the blue ribbons, but at this year's Eastern National Livestock Show special prizes will be given to the "hired hands."

The show, fourth largest livestock exposition in the nation, will be held at the Maryland State Fair Grounds at Timonium November 15 through 20.

A prize of $25 will be awarded to the herdsman who, in the opinion of the judges, keeps the cleanest stalls in the show's cattle barns.

An additional prize of $25 will be offered to the county 4-H Club or FFA group which keeps the cleanest stalls for the cattle it is exhibiting.

Several Baltimore restaurants and allied groups also have contributed to stage an outdoor barbeque for the adult herdsmen on November 18.

# THE SHAVER STARCROSS 288

## THE NATION'S TOP LAYER

**. . . an achievement of Canada's great breeding farm!**

Our research programme is supervised by three of the continent's top geneticists In addition to the home plant in Galt, Canada, we employ adequate test facilities at three locations in Canada, and two in the U S A

The SHAVER STARCROSS 288, best of 171 strain crosses involving 16 pure strains of Leghorns tested at the widely separated Research Units of the Shaver Poultry Breeding Farms Ltd., demonstrated its outstanding superiority . . .

## To Win FIRST PLACE In The 1958 Canadian Central Random Test

| | Shaver Starcross 288 | Test Average |
|---|---|---|
| Average egg production per chick started (reckoned to 500 days of age on 110 pullets) .. | 233 | 197 |
| Percent Mortality from 7 days to 500 days of age . .... ... | 5.1 | 8.1 |
| Lbs. of feed per dozen eggs . | 4.3 | 5.1 |
| Percentage of all eggs laid grading large .. . .. .... | 63.9 | 59.6 |
| Net Income over Chick and Feed Costs ..... ..... .. | $ 3.00 | $ 2.09 |

**Perhaps when it comes to owning a Canadian layer, you're from Missouri, so lets look at the performance of the SHAVER STARCROSS 288 entry at the 4th Missouri Random Test!**

**Ranking—Top Quartile.**

**Net Income—$4.25 per bird (Test average $3.76).**

**Eggs per pullet housed—245.6 (Test average 226).**

# Potato Imports Placed Under Regulations

A regulation which specifies minimum grade and size requirements applicable to Irish potatoes imported into the United States was issued today by the U S Department of Agriculture. A similar regulation on potato imports was in effect last season. The regulations will be effective from Oct. 13, 1958, through July 15, 1959

The importation of round white or red skin varieties is limited to the U.S No. 1, or better grade, 2½ inches minimum diameter and 4 inches maximum diameter.

Long variety potatoes, such as the Russet Burbank variety, must meet the requirements of the U.S. No. 2, or better grae, 2 inches minimum diameter or 4 ounces minimum weight, Size A, and may be "not more than slightly skinned."

In addition, all imported potatoes have to be generally "fairly clean'

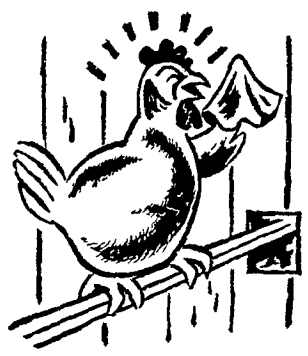
The regulation does not restrict importation of certified seed potatoes. Also, any lot not in excess of 500 pounds of potatoes may be imported without regard to the regulation.

Most of the potatoes imported into the United States come from Canada. The Canadian Fruit and Vegetable Inspection Service is designated by the U.S Department of Agriculture as an authorized inspection agency for shipments of Canadian potatoes The Canadian potato standards may be used on the same basis as comparable United States grade standards, except that tolerances for size as specified in the United States standards may be used.

## Cut C.R.D Medication Cost

with ROCKLAND

**"PARA-STREP"* DUST**



PARA STREP is equally as effective as or better than, the standard 47 base grams of dihydrostreptomycin, but actually costs less.

PARA-STREP is approved by the U. S. Food and Drug Administration for safety and effectiveness.

PARA STREP is a patented combination of dihydrostreptomycin and Para-Amino Benzoic Acid (RC-12) in micronized dust form The two drugs fortify each other by scientific synergistic action, making the combination far more effective than if the pair were administered individually. One 400 cc. bottle treats 1,000 birds.

# Young Dairyman Named Star American Farmer

Harrisburg, Oct 15 — A young dairy farmer from Pennsylvania who has developed Holstein cows with outstanding production records has been chosen as one of the four recipients of the nation's most coveted farm youth awards.

He is James H. Speer, Jr., 21, of Blairs Mills, Huntingdon County, who has been chosen by the Future Farmers of America as Star American Farmer of the North Atlantic Region. Word of the distinction won by young Speer was received here by James C. Fink, acting State FFA advisor, from Kansas City where the designation of the Pennsylvania boy was announced at the Tuesday evening session of the 31st annual FFA National Convention in colorful ceremonies during which Speer received a $500 check from the Future Farmers of America Foundation, Inc

Young Speer shared the spotlight with three other FFA members who also were named as Regional Star American Farmers They are Jimmie John Jarnagin, Jr , 21, of Hanston, Kansas, Ethan Labrier, 21, Kenton, Oklahoma, and Malcolm A Niles, 20, Loleta, California.

Although the award is Speer's highest, it is only one of a long list of honors won by him as an FFA member. Because his achievement record was highest among all FFA boys who received the "Keystone Farmer degree" at the 1956 State Farm Show, Speer was proclaimed FFA's 1956 State Star Farmer. Later that year, in competition with like winners from 12 notheastern states, he was named the North Atlantic Region's Star State Farmer In 1957 he was the FFA State President and later, chairman of the FFAs 1957 national convention committee

As a dairy farmer, James has 18 producing cows, which, during the last complete year of record keeping, averaged 12,900 pounds of milk and 496 pounds of butterfat per cow. He says he considers any cow producing less than 10-000 pounds of milk and 400 pounds of butterfat a cull animal.

When he evinced interest as a lad in becoming a farmer, his parents encouraged him and gave him a heifer calf By the time he entered high school and was old enough to join the FFA, he had two producing cows and a heifer calf His interest in farming by then was such that he passed up the nearest high school at Orbisonia and enrolled at the Juniata Joint High School at Mifflintown 37 miles away, where he could get the vocational agriculture course He spent three hours a day on the school bus, leaving home at 6 45 a m and returning at 5 00 p m As a high school sophomore he began keeping farm accounts for his father's entire 325-daily operation and for three successive years won first place in the State in FFA's farm records contest

Upon graduation from high school in 1955. James and his father operated the family farm as partners but when, in January, 1957 an adjoining 350-acre farm became available, James made arrangements to buy it, complete with livestock and machinery for $17 200 James fed and groomed the animals, which had been poorly handled, and repaired and repainted the machinery which, although fairly new, had been allowed to deteriorate In April he held a public auction sold the livestock and machinery for $10 541, leaving him the farm land and buildings for an investment of only $6,659. His farm his daily herd, some registered Hampshire swine, and machinery he owns give him a net worth of $29 701

**Weed-Free Tobacco Beds.** Here's how to do it. Sprinkle VAPAM® on your seed beds now. Come spring, you get more seedlings per square yard — up to twice as many. And only a few — if any! — weeds. Your seedlings are really strong and vigorous. You can transplant fast for the best crops you've ever seen.

Make more profit next year! Don't share your crop with weeds and soil borne diseases. Put VAPAM on your seed beds now. No special equipment needed. It's so easy and safe to sprinkle on. You get stronger seedlings, weed control and more profit. Do it now for best results. Approved by the Department of Agriculture and leading growers for all food and fibre crops.

## 'Gone Gobblin's' For Spook Night

Whether the frost has nipped the "punkin" or not, we don't know; but he's a beautiful yellow-orange and turned Jack-o-Lantern, he has a wonderful toothy grin that reminds us Halloween is here for celebration.

Instead of allowing your youngsters to roam the streets for their treats, why not invite their friends for a treat at home and make it a dinner party. Here's the trickiest menu treat you'll find
Bean Bake & Halloween Kabobs
Hot Dog Buns
Peach "Pumpkin" Salad
Spicy Baked Apples
Beverage

* * *

Beans in Tomato Sauce are a teen age favorite Top a big casserole of plump, brown beans with Kabobs made so.

### HALLOWEEN KABOBS

- 2 cans (one pound) Beans in Tomato Sauce
- 4 frankfurters, quartered crosswise
- Mild mustard
- 3 dill pickles, quartered crosswise
- 2 small onions, each cut into six crosswise slices
- 1 tablespoon salad oil
- 2 teaspoons vinegar

Heat oven to 350 degrees Spoon beans into shallow baking dish Dip cut ends of each piece of frankfurter into mustard. Alternate pieces of frankfurter, pickle and onion on skewer, beginning kaboband ending with meat Arrange kabobs on top of beans Brush kabobs with mixture of oil and vinegar. Bake 40-45 minutes or until beans are hot Makes 4 servings

Peach Pumpkin Salads have delighted the young in heart for many years Here's the recipe

### PEACH "PUMPKIN" SALADS

- ½ cup cottage cheese
- 6 canned peach halves, drained

Fill peach half with cheese Place on lettuce, rounded side up Make a face on this "pumpkin" using a slice of maraschino cherry for a mouth, a raisin for a nose and raisins or slices of green olives for eyes Place a small piece of celery at the top for stem.

For dessert, crimson coated, Spicy Baked Apples. The spice flavor comes from a ketchup-based syrup that bubbles and boils and spreads its rich goodness through the crisp, tart fruit

### SPICY BAKED APPLES

Heat oven to 350 degrees. Wash and core apples. Pare apples one third of the way down, place in shallow baking pan. Top each apple with one tablespoon ketchup combined with one tablespoon water. Bake 45-60 minutes, basting occasionally, or until apples are tender.

* * *

Since we always think of pumpkin pie when we think of Halloween, here is a recipe for pumpkin pie. There are many, many recipes for pumpkin pies but this one is a bit different in that it makes use of a favorite sweetener maple syrup. We hope you'll like it.

### PUMPKIN PIE

1 cup cooked or canned pump-

(Continued on page nine)

(Continued from page eight)

kin
1 tablespoon cornstarch
½ teaspoon cinnamon
½ teaspoon nutmeg
¼ teaspoon salt
1⅓ cups maple syrup
½ cup milk
⅓ cup sugar
1 teaspoon butter or margarine (melted)
2 eggs beaten

Sift into the pumpkin the cornstarch, cinnamon, nutmeg, sugar and salt. Mix thoroughly Add melted butter or margarine, milk and maple syrup. Mix again. Stir beaten eggs in. Pour into a 9-to 10-inch pie shell and bake 15 minutes at 450 degrees. Then lower to 325 degrees. Continue baking 40 minutes until done

Cookies and cake are always a welcome treat at Halloween time. Try this Nut-Crowned Applesauce Cake on your "trick or treaters."

### NUT-CROWNED APPLESAUCE CAKE

**Pan Coat**

⅓ cup butter or margarine
¼ cup sugar
½ cup chopped walnuts

**Cake Batter**

2 cup sifted enriched flour
1 teaspoon baking powder
1 teaspoon soda
1 teaspoon cinnamon
½ teaspoon salt
¼ teaspoon nutmeg
¼ teaspoon ground cloves
½ cup shortening
1¼ cups sugar
1 egg
1 cup unsweetened applesauce
1 teaspoon grated lemon rind

Melt butter or margarine in bottom of 9 inch square pan. Coat pan bottom evenly and then sprinkle with sugar Cover sugar with layer of nuts. Sift together flour, baking powder, soda, salt and spices. Cream shortening and sugar together until light and fluffy. Add egg and beat well. Add applesauce and lemon rind to creamed mixture alternately with flour mixture. Turn batter into prepared pan. Bake in moderate oven (350 degrees) about 55 minutes. Allow to cool in pan about 5 minutes. Turn upside down and cut in squares.

Frosted cookies take a little extra time but they also have an extra delicious flavor so it is really worth your while.

### BUTTER COOKIES WITH CREAMY CHOCOATE FROSTING

2¾ cups sifted flour
½ teaspoon baking soda
½ teaspoon baking powder
½ teaspoon salt
¾ cup butter
1½ cups sugar
2 eggs
1 teaspoon vanilla
1 cup dairy sour cream

Sift flour and remaining dry ingredients together. Cream butter Add sugar gradually, mixing well Add eggs, vanilla and sour cream Blend in the sifted dry ingredients. Drp teaspoons of the dough onto a buttered cooky sheet and bake in a preheated 400 degree oven for 8 10 minutes. Yield 6 dozen.

### CREAMY CHOCOATE BUTTER FROSTING

½ cup butter
1 1 pound package confectioners' sugar, sifted
1 egg
1 teaspoon vanilla
⅛ teaspoon salt
1 tablespoon milk or cream
2 square unsweetened chocolate, melted

Cream the butter until smooth. Add one-third of the sifted confectioners' sugar and cream thoroughly. Add the salt, milk and vanilla Blend. Add unbeaten egg and melted chocolate and beat until smooth. Add remaining amount of confectioners' sugar. Beat until smooth. If frosting is a litle thick, more milk or cream may be added.

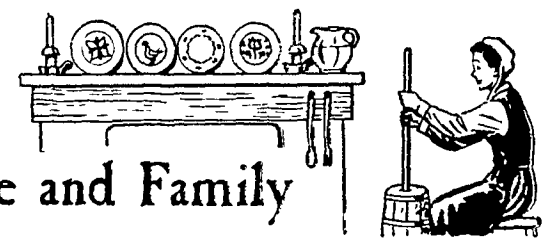
Brownies are another favorite—

### BROWNIES

1 cup sugar
½ cup butter
2 squares unsweetened chocolate
2 eggs
1 teaspoon vanilla
¾ cup all purpose flour, sifted
1 cup coarsely chopped nut meats

Sift sugar Beat butter until soft. Add the sugar gradually and blend these ingredients until they are creamy. Melt chocolate over hot water, add to butter and sugar Beat in eggs one at a time Add vanilla, then add the flour, beating until well blended only Fold in coarsely chopped nut meats. Butter an 8 or 9 inch square pan. Pour the batter into it. Bake the brownies in a moderate oven, 350 degrees, for about 30 minutes Cut into squares when cool Top with confectioners' sugar or chocolate frosing and nuts.

# For the Farm Wife and Family



### LACY CORNFLAKES CRISPS

¼ cup butter
¼ cup sugar
⅓ cup light molasses
1 6 ounce package chocolate chips
4 cups corn flakes, uncrushed

Combine butter, sugar and molasses; bring to a full boil over moderate heat, stirring constantly Remove from heat and stir until well mixed the chocolate chips and cornflakes Drop by teaspoonfuls on ungreased cookie sheet Bake at 350 degrees 6 to 3 minutes Cool 2 to 3 minutes Then remove from cookie sheet with spatula Makes about 6 dozen.

### ORANGE REFRIGERATOR COOKIES

2¾ cups sifted flour
¼ teaspoon baking soda
½ teaspoon salt
1 cup shortening
½ cup dark brown sugar, firmly packed
1 orange rind, grated
2 tablespoons orange juice
1 teaspoon vanilla
2 eggs
½ cup nuts, finely chopped
1 6-ounce package semi-sweet chocolate bits, finely chopped

Sift flour soda and salt together and set aside. Blend shortening, sugar, orange rind, orange

juice and vanilla. Beat in eggs, one at a time. Add flour mixture, nuts and chocolate. Shape on waxed paper in two 12" rolls. Roll up and chill overnight. Preheat oven to 375 degrees. Unroll and cut in 1/8-inch slices Place on ungreased cookie sheet. Bake 8 minutes. Makes about 14 dozen.

* * *

### SUGAR-COATED LOLLIPOPS

Melt one package (6-ounces) semi-sweet chocolate bits and two tablespoons shortening with one-third cup water over hot water, stir until smooth. Cut one quart vanilla ice cream into 8 slices and insert wooden skewers in each. Coat ice cream slices with chocolate, and dip in sugar-coated cereal. Freeze until firm and wrap

* * *

### CHOCOLATE QUICKIES

**BASIC RECIPE**

1 6-ounce package semi-sweet chocolate bits
4 tablespoons light corn syrup
1 tablespoon water
2 cups any ready-to-eat cereal

Combine chocolate bits, corn syrup and water and melt over hot (not boiling) water Remove from water and gently stir in the cereal. Drop by teaspoonfuls on waxed paper-lined cookie sheet Chill till firm. Makes 2½ to 3 dozen.

**VARIATIONS**

1 Follow basic recipe — use only three tablespoons light corn syrup. Add one of the following in place of cereal

1 cup mixed candied fruit
1½ cups coconut
1 cup dates, cut up
1½ cups raisins
1 cup salted nuts

2. Follow basic recipe — use only three tablespoons light corn syrup. Drop by teaspoonfuls on waxed paper-lined cookie sheet. Decorate with nuts, chicken corn, mints, gum drops, tinted coconut, slivered almonds.

3. Semi-sweet Dip for Party Pretties — Follow basic recipe, omitting cereal and using four tablespoons light corn syrup.

a. Cookies — invert cookie-slide diagonally in semi-sweet mixture to coat top of cookie halfway. Remove excess by scraping edge on rim of bowl.

b Pretzels — hold pretzels with tongs or forks Dip in semi-sweet mixture to cover

c. Marshmallow, caramels, dates, nuts, etc — With fingers or toothpick, dip in semi-sweet mixture and swirl gently to coat top, and part of sides, if desired.

Fudge is always a favorite —

### NUT-MALLOW FUDGE

¾ pound (48) marshmallows
¼ cup butter
1 tablespoon water
⅛ teaspoon salt
1 6-ounce package (one cup) semi-sweet chocolate bits
1 teaspoon vanilla
1 cups nuts, chopped

Combine marshmallows, butter, water and salt and bring to full boil over moderate heat, stirring constantly. Boil 1 minute. Remove from heat and stir in till smooth the chocolate bits and vanilla. Add nuts. Pour in greased pan 10" x5" x3". Chill till firm. Makes about one and one-fourth pounds.

* * *

1 jar marshmallow cream (5 ounce ot 10 ounce jar)
⅔ cup evaporated milk
¼ cup butter
1½ cups sugar
¼ teaspoon salt
2 6-ounce packs semi-sweet chocolate bits
1 teaspoon vanilla
½ cup nuts, chopped

Combine the marshmallow cream, milk, butter, sugar and salt and bring to a full boil. Boil 5 minutes over moderate heat, stirring constantly. Remove from heat and stir in the chocolate till melted Add vanilla and nuts. Pour in greased 8" square pan and chill till firm Makes about two and one-fourth pounds.

### BEAN, CARROT, AND CABBAGE SALAD

Two cups cold cooked dry beans
One-half cup coarsely shredded carrots
One-half cup shredded cabbage
One small onion, grated
One-fourth cup pickle relish
Salt
One third cup french dressing

Combine ingredients and mix lightly Serve very cold Serves 4.

## Good Light Needed For Sewing Comfort

Good lighting may be a problem without recognizing it. The convenience of electric lighting is accepted but not enough importance is placed on the comfort that comes from good lighting.

Light from an electric bulb can be harsh. It needs to be softened by a shade and a diffusing bowl or shield. It needs to be controlled so it doesn't glare.

Light can be absorbed and light can be reflected. Dark colored walls absorb light and cut down the amount available for "seeing" jobs. Light colored walls reflect and make the light in the room more useful.

Colored lampshades absorb light. A colored lampshade is acceptable if it has a white lining to reflect light A lampshade may be made of thin material and the outline of the bulb shows through making an uncomfortable glare

The size and shape of a lamp affect the amount of useful light from it. Height needs to allow for a spread of light over the work being done Width of the shade across the bottom controls the area covered by light.

Look for a lamp that has the elements of good lighting. This requires careful shopping. When you combine the requirements of good lighting with the desire for a well-designed lamp, pleasing in appearance, the problem of selecting a lamp is even more difficult.

## DAIRY COWS NEED DAILY EXERCISE

October is a good time to start thinking about things that can be done during the winter months, to help maintain efficient milk production. One would be to provide a good place for cows to exercise each day during he stabling season

A cow, like any other animal, needs exercise in order to stay in good health. She cannot work at top efficiency if she is stanchioned all day long, seven months of the year Just fifteen minutes in the exercise lot, twice each day, will provide the exercise the cow needs

Start the exercise periods as soon as cows are brought into the barn Continue it every day until pasture season Weather conditions seldom get too bad if the cows become accustomed to being out.

## PROTECT BLOOMING MUMS FROM FROST

It's a shame to end the fall's bloom in the garden just because of an ordinary fall frost, when it need't happen Fall mums withstand cold temperatures very well, but frost will damage open blooms

To prevent frost damage get old burlap sacks to cover all the mum plants Any similar material will do Gently place the material over the plants to be protected before dark. If there is a frost, it may form on the burlap, but won't harm the fowers Don't remove the cover in the morning until frost has melted

# USDA Announces 1958-Crop Reseal and 1957-56 Crop Extended Reseal For Supported Crops

The U.S. Department of Agriculture has announced an extention of the reseal program on farm-stored price-supported crops for an additional year. This will give farmers an opportunity to earn substantial payments for the additional storage periods, at the same time helping to ease the overall storage situation in a year of record grain supplies.

The extension will enable farmers to keep 1958 crop barley, grain sorghums, oats, rye, corn, and wheat in certain areas in farm storage under price support loans for another year following maturity dates of original loans in 1959. In addition price-support reseal loans on 1957-crop barley, oats, corn, and wheat, and 1956-crop corn are being extended for another year.

Early announeement of the reseal programs is being made to give farmers more time in which to make their storage plans for the coming year. They will be able to make provision for additional storage capacity on their farms to keep price-support grains under reseal, and at the same time provide for their 1959-crop storage requirements.

Estimated grain carryovers will be at record levels next year and substantially higher than the carryovers at the time 1958-crop harvests began.

Under the reseal program, farmers will earn storage payments during the time the grain is under reseal. These payments will take care of a large part of the cost of new storage. Under the farm storage loan facility program, farmers may borrow up to 80 per cent of the cost of constructing new storage or making additions to existing structures. These loans are repayable oer a 5 year period and bear interest at 4 per cent.

Payments earned under the reseal program, and financing under the facility loan program, offer substantial aid to farmers in increasing their farm storage capacity. Farmers can add needed buildings to their farm plants, and at the same time earn storage payments under the reseal program which will pay for the new space in three or four years' time.

This also will help increase total storage facilities In addition it will keep grains stored on farms in production areas where most of the feed grains eventualy will be consumed.

The reseal program, which is similar to those in past years, will be made available in certain areas for each of these grains on the basis of recommendations by State Stabilization and Conservation (ASC) Committees that the program should apply in their States.

State ASC Committees will consider feasibility of safe storage of the grains on farms for another year and storage needs for the next price-support takeover of crops in making their decision.

Under the program, farmers will be able to extend their farm-storage loans on these grains or to convert their purchase agreements on the 1958 crops to loans for another year.

In areas where State ASC Committees announce a program, farmers who desire to participate should make application to their county ASC offices three or four weeks before loan maturity dates

In general, maturity dates for the six grains are· wheat and grain sorghums, March 31; oats and rye, April 30, barley, March 10 and April 30, and corn, July 31 — all in 1959.

Under the reseal program announced today, price - support farm stored loans on 1958-crops taken out this fall and summer, and on 1957 and 1956-crop corn alreay under reseal may be extended to loan maturity dates in 1960.

At present, storage payments for the full year's reseal or extended reseal are 16 cents per bushel for corn and barley, 12 cents per bushel for oats, and 16 cents per bushel for wheat and rye in some States and 17 cents in others, and 28 to 31 cents per hundredweight for grain sorghums

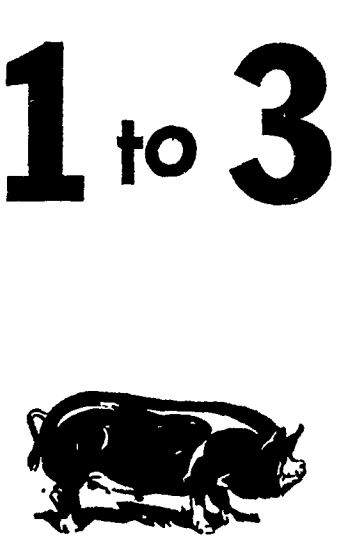
If changes are made in rates under the Uniform Grain Storage Agreement for commercial storage, corresponding adjustments will be made in reseal storage payments

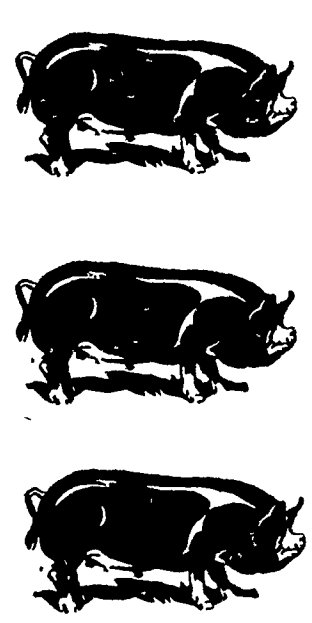
If a farmer redeems his resealed grain prior to the new maturiay date, his storage payment will be prorated.

Farmers who have 1957-crops and 1956 crop corn under extended reseal will receive the full storage payment for the storage period which has elapsed, at the time they extend their loans

They will receive another storage payment at the end of the extended period. Storage payments on grains under reseal will provide supplementary income to producers who have available storage or build new storage.

1 to 3





For every dollar invested in limestone, experiment stations conclude, three dollars are returned in increased crops. Sometimes the ratio climbs to one to 15.

This explains why the Government pays about half the cost of applying limestone, if help is desired. The Government is convinced that farmers cannot afford to not use limestone.

Where else does one dollar spent bring at least three in return? It does pay to use good limestone!

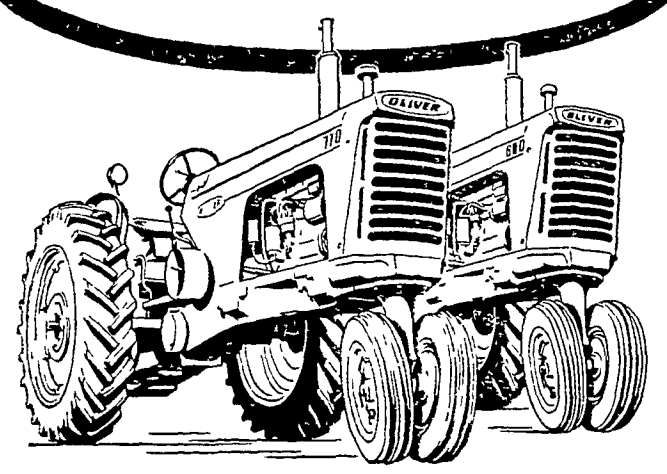
Powerful New Arrivals!
OLIVER 770 and 880
Row-Croppers for '58



Put new life into your farming with a new Oliver —3-4 plow 770 or 4-5 plow 880. They're spanking new in looks, in design, in feel.

They put more power to work—in practical new ways. Big, high-speed engines give you more drawbar horsepower than ever—well over the 50 mark in the 880. A new Power-Booster Drive gives you 12 forward speeds and almost one-third more pull for the tough spots—on the go.

In plowing, Oliver's new Power-Traction Hitch transfers extra weight to the rear wheels, keeps you going at full speed. Powerjuster wheels take the work out of changing tread, and power steering makes every maneuver easier.

Come in and see these powerful new Olivers, now in bright new meadow green and clover white. Feel their power, too, and learn how it can help you boost farm profits.

### Multiple Farrowing System

# Confinement Hog Rearing Shown

CAYUGA, N Y — The first multiple farrowing, confinement rearing hog unit in the East was center of an Oct 11 open house here. More than 200 pork producers and other interested agriculturists, including several from Lancaster County, attended the open house program.

Multiple farrowing is a program for the use of a 30 to 36 sow unit in a rotation breeding system Willard D Lashbrook, manager of the Beacon Milling Company research farm where the unit is located, told visitors that such a system enables feeders to market more than 500 pigs per year at intervals from six to eight weeks.

By getting away from the traditional two farrowing periods per year, continuous use of all facilities, greater labor efficiency, steadier income and higher selling prices for pigs are achieved.

A sow colony, farrowing hut, nursery and finishing shelter make up the unit The sow colony consists of three 12 ft by 22 ft shed type resting shelters for 10 to 12 sows each

A similar three-sided shed for two boars, and a shade area where feed and water are provided completes the colony

The 18 ft x 36 ft farrowing hut is fully insulated on all walls, ceiling and floor. Farrowing and nursing facilities for ten sows and litters are provided in this building.

Electric floor heating provides heat, with higher temperatures maintained under the pigs than under sows This helps keep the pigs away from sows except when nursing, decreasing danger of injury and speeding weaning.

Sows are exercised twice daily on a concrete platform on one end of the building. Intake and exhaust fans ventilate the building

Eighty pigs, four to eight weeks old, can be housed in the nursery This building is 16 ft. x 30 ft, plus the 12 ft x 30 ft. outside cement feeding floor. At eight weeks, market pigs move to the finishing porch, a 77 ft. x 28 ft shed with a concrete floor, but no heat.

An outside-fill, bulk self feeder runs the length of the building, and the building is constructed for mechanical cleaning.

Professor Ellis Pierce, Cornell University, conducted several live hog grading demonstrations during the open house to emphasize the importance of meat type hogs Further emphasis of the desirability of meat type hogs was provided by a display of dress carcasses.

# Tobacco Supports Up From '57 Level

The U S. Department of Agriculture today announced the average price support loan levels for 1958 crop Burley, fire-cured, dark air-cured, Virginia sun-cured, Maryland, cigar binder, and cigar filler and binder tobaccos.

The average levels of support are shown below, with comparable levels for 1957:

| TYPE OF TOBACCO | 1958 Average Loan Level Cents per lb | 1957 Average Loan Level Cents per lb. |
|---|---|---|
| Burley, Type 31 | 55.4 | 51 7 |
| Virginia Fire-cured, Type 21 | 38.8 | 38.8 |
| Kentucky-Tennessee Fire-cured, Types 22-23 | 38 8 | 38 8 |
| Dark Air-cured, Types 35-36 | 34.5 | 34.5 |
| Virginia Sun-Cured, Type 37 | 34 5 | 34.5 |
| Maryland Type 32 | 50 8 | 48 0 |
| **Cigar binder:** | | |
| Conn. Broadleaf, Type 51 | 56.2 | 53 8 |
| Conn. Havana Seed, Type 52 | 48.0 | 48.3 |
| **Cigar filler and binder:** | | |
| Ohio filler, Types 42-44 | 23 4 | 23 2 |
| N. Y. & Pa Havana Seed, Type 53 | 25.5 | 23 3 |
| Southern Wisconsin, Type 54 | 25.5 | 23.3 |
| Northern Wisconsin, Type 55 | 31 0 | 29 9 |

(The loan level for Puerto Rican cigar filler tobacco will be announced later)

In its announcement April 7 giving the minimum average leves at which 1958 crops of these tobaccos would be supported, the Department stated that the actual level of support would be the minimum then announced on the basis of April, 1958, parity prices or the level computed on the basis of parity prices as of the beginning of the marketing year (Oct. 1 for these types), whichever was higher Levels of support for most types are slightly highe than the minimum levels announced, the increases ranging up to one-half of a cent per pound.

**Growers of Pennsylvania Seedleaf, Type 41, tobacco will not receive price support, as they disapproved marketing quotas on the 1958 crop.**

For those kinds of tobacco for which growers have approved marketing quotas, price support is mandatory at 90 per cent of parity, except for fire-cured and dark air-cured (including Virginia sun cured)

## Farm Show Deadline

(Continued from page one)

show to be presented Thursday night of Farm Show Week. Riders will be members of 4-H Light Horse and Pony Clubs throughout the Commonwealth An initial try-out of this type of show proved successful at the 1958 Farm Show

Entry blanks for any department in the Farm Show are provided within each copy of the 1959 Farm Show premium list. Premium lists will be available in early October from John B. McCool, Farm Show Director, or from any one of the State's 67 county agricultural agents.

Show the Commission has sanctioned a light horse and pony

A TWO-FOLD "TREAT" to be sure are the beautiful young ladies shown here And why not? The young lass on the left is none other than Miss Susan Treat, 19-year-old Orange, Conn farm girl, who is also Miss Eggtober of 1958 With our first "treat' is Miss Diane Bitting, 17-year-old Bucks County broiler producer, who also is Penna Poultry Industry Queen for 1958-59

THE VETERAN and the up-and-comer — David Redding, 18-year-old Gettysburg, Pa., farm lad who was named the NEPPCO-FFA Star Poultry Farmer of the 14-state Northeastern area, looks over one of the Leghorn hens he rears on his own farm, layers which are bred on the farm of Guy A Leader Sr (right) The father of Pennsylvania's Governor George Leader, a resident of York, met with Redding at the 21st annual exposition of the Northeastern Poultry Producers Council in Harrisburg, Pa More than 5000 persons visited the exposition

A smart husband doesn't get so busy bringing home the bacon that he forgets the applesauce

**More than a fourth of the dairy cows in the United States are now bred artificially.**

# 1958 Corn Supports "Unchanged"

The U S. Department of Agriculture today announced that price support rates for 1958-crop corn will be unchanged from the "advance" minimum rates announced earlier this year

Following are the rates available for corn produced in 1958

1 Corn produced in compliance with acreage allotments in the commercial corn-producing area will be eligible for support at a national average price of $1.36 a bushel, the same as the minimum announced last spring

2 Corn produced in noncommercial areas will be supported at 75 per cent of the level of price support to cooperators in the commercial corn area

3 Corn produced in the commercial area, but not in compliance with acreage allotments, will be eligible for support at a national average rate of $1 06 per bushel as announced Sept 26

In accordance with legislation, the Department on March 31 established the $1 36 minimum average suppor level for 1958-crop corn produced by cooperators in the commercial corn-producing area It represented 77 per cent of the April 1958 parity price for corn

Under law, the minimum average support rate announced last spring could not be decreased, but would be increased if a combination of the corn parity price as of Oct. 1, 1958 — beginning of the marketing year—and the supply percentage of the same date indicated a higher minimum level of support

The indicated supply of 5,115,000,000 bushels of corn available for the 1958-59 marketing year is 134 8 per cent of the normal supply figure of 3,793,600,000 bushels USDA officials explained. Under the legal formula this calls for a support level of 75 per cent of the October 1958 parity for corn, which is $1.76 per bushel. This would amount to $1 32 per bushel, but since the previously announced minimum national average support rate of $1.36 per bushel may not lawfully be decreased this latter figure becomes the final rate.

The price support level for 1957-crop corn produced under acreage allotments in the commercial corn-producing area was $1 40 per bushel reflecting 77 per cent of the October 1957 parity price.

Corn grown in the noncommercial areas in 1957 was supported at a national average of $127 per bushel, reflecting 70 per cent of parity as required by laws in effect for the 1957 corn crop. Noncompliance corn produced in the commercial area in 1957 was supported at a national average rate of $1.10 per bushel.

Price support programs for the 1958 corn crop wil be carried out through Commodity Credit Corporation loans and purchase agreements, as in the past These will be available from harvest time through May 31, 1959 in most areas, and will mature on July 31, 1959. Rates by counties for loans and purchase agreements are available at State and County Agricultural Stabilization and Conservation (ASC) offices

A total of 932 counties in 26 states are included in the 1958 commercial corn area.

# Potato Sacks Marked U. S. Extra No. 1 May be Used; Grade is Discontinued

Potato sacks marked "U. S. Extra No 1" may be used within limits that were announced today by the U S. Department of Agriculture

This grade was dropped from the U S. Standards for Potatoes which became effictive July 15. Normally, any produce marked with a non existent U. S grade is considered to be misbranded or misrepresented under the Perishable Agricultural Commodities Act. However, because this was an officially designated grade which has now been withdrawn, the USDA has authorized the use of stocks which exist in a few states with the following limitations:

1. Potato sacks marked "U. S. Extra No 1" which were ordered or procured prior to May 12, 1958 (the date on which the revised standards were published) may continue to be used.

2. Federal and Federal-State inspection and certification, based on the old U. S. Extra No. 1 grade, will not be provided except for contracts entered into prior to May 12, 1958.

3. It will not be considered to constitute misbranding if potatoes packed in such sacks are officially inspected and certified as meeting at least the quality requirements of the new U. S. No. 1 grade and the size requirements of the new U. S. Fancy grade

4. Potato shippers or packers who have an inventory of these sacks should inform their local Federal or Federal-State inspection office of the number and kind of such containers which they have on hand in order that appropriate inspection arrangements can be made.

# Udder Congestion Unaffected By Grain Feeding

Recent research at several institutions shows that the amount of grain fed does not appreciably influence udder congestion at calving time In an attempt to control udder swelling some dairymen have withheld or limited grain feeding of dry cows and cows that have recently freshened

Richard Adams Extension Dairy Specialist, warns that such practice can be harmful to the health of the cow as well as milk production

In Cornell studies, the feeding of as much as 15 lbs of grain per head daily during the dry period did not significantly increase udder congestion

Research conducted at Maryland and Ohio suggests that heavy grain feeding immediately after calving, as well as during the dry period, does not affect udder congestion.

These findings have been confirmed by Illinois workers, who found no difference in amount or incidence of udder congestion when the feeding of six and one-half to nine lbs of grain per head daily was compared to no grain feeding during the dry period

Dr Adams says there is also considerable evidence that bulky, laxative feeds are not superior to the usual grain mix in preventing udder congestion Good feeding practices demand that cows receive sufficient grain during the dry period to place them in good, working flesh.

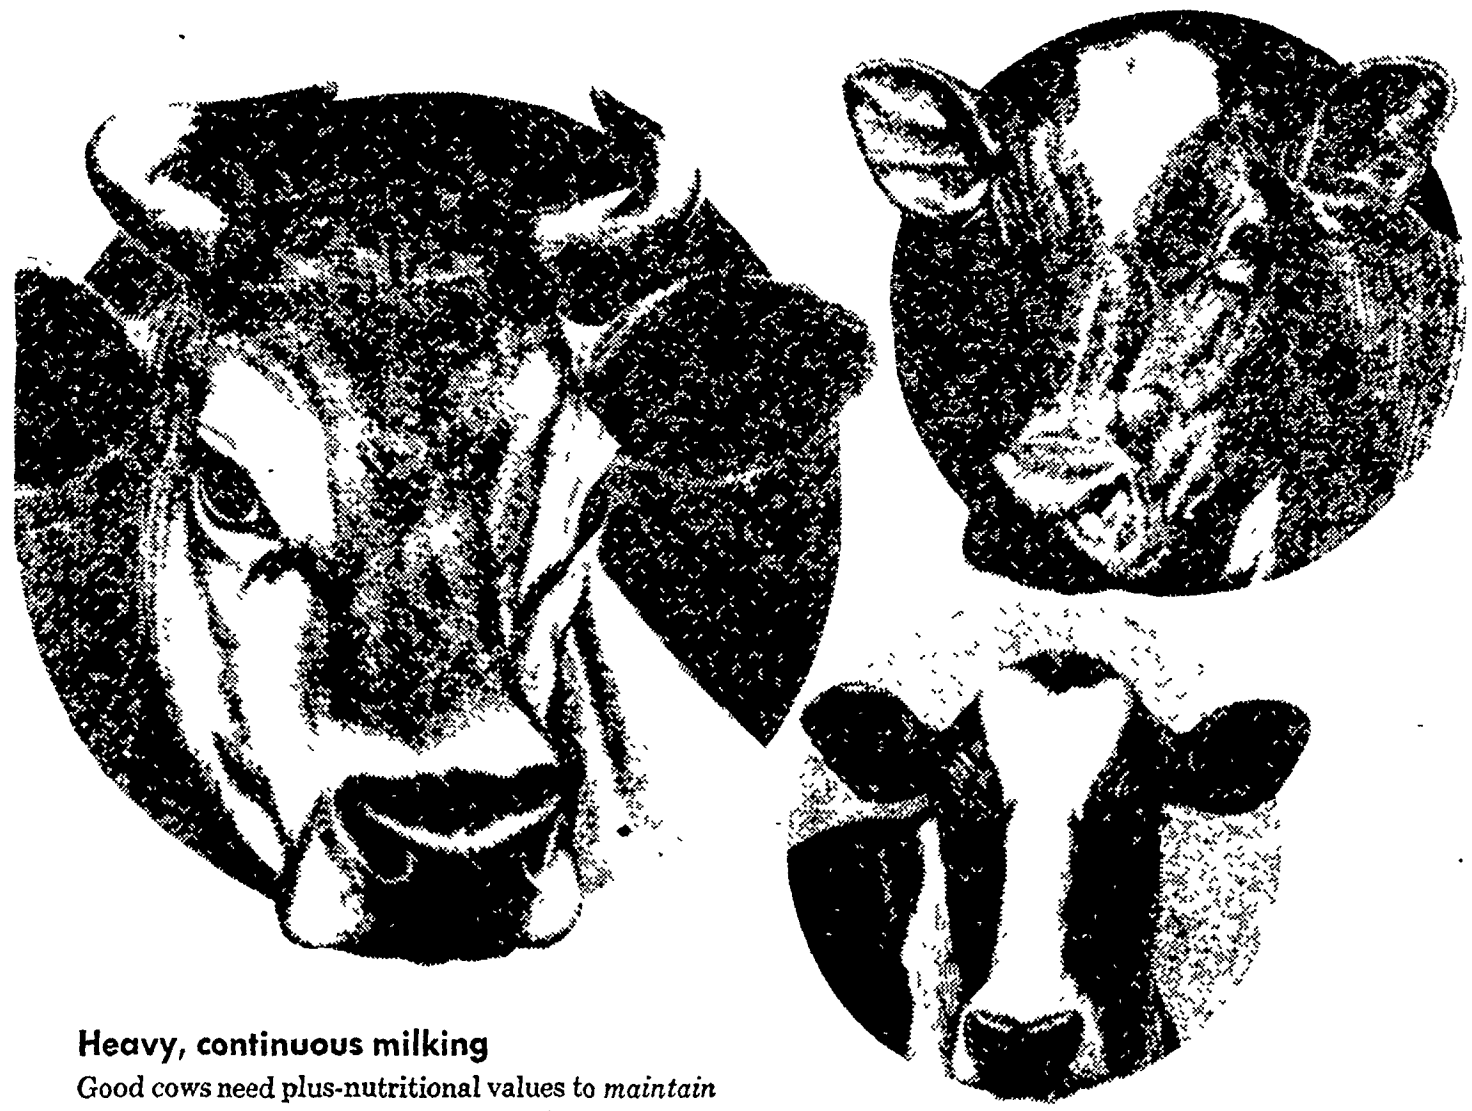
Avoid over-conditioning as well as under-conditioning The grain mix fed to the milk herd should be entirely adequate if the dry cows are being fed comparable roughage

Approximately seven to 10 days before expected calving cows of the small and large breeds should be receiving 8-10 lbs of grain respectively Do not reduce the amount of grain fed at freshening unless the cow is a finicky eater

Maintain this level of feeding for about one week after calving, then increase grain feeding according to production needs and appetite This method of dry, and fresh cow feeding, can help eliminate stress on the cow and increase milk production during her lactation

# Added Nutritional Strength

## IN FUL-O-PEP DAIRY FEEDS PROMOTES MAXIMUM MILK PRODUCTION!



**Heavy, continuous milking**

Good cows need plus-nutritional values to *maintain maximum milk production* and sound health. That's why Ful-O-Pep Dairy Feeds are highly-fortified, highly-nutritious . . . to help you get maximum efficiency from the feed you buy.

**Feeds bacteria in cow's rumen**

Ful-O-Pep Dairy Feeds feed the bacteria in the rumen, as well as the cow. These tiny organisms help your cow break down more of the grain and roughage into nutrients which the cow can assimilate and convert into milk . . . another big reason why Ful-O-Pep Feeds are efficient and economical.

**You get only the nutrients you pay for**

Feed your cows good feed and they'll give you good results. A quality ration gets full feeding value out of roughage—boosts milk production. And remember, with Ful-O-Pep *you get the nutrients you pay for* . . . you get added nutritional strength! See your Ful-O-Pep Dealer today.
